

ALTERNATORS FOR THE MARINE INDUSTRY

A complete range

LEROY SOMER is a world leading manufacturer of alternators with one of the widest ranges from 1 to 25000 kVA for speeds from 428 to 3600 RPM and voltages up to 15000 V.

In the marine industry, **LEROY SOMER** generators are used in standard gensets, but also for electrical propulsion.

Designed with the constant care of improving performances and quality (ISO 9001), **LEROY SOMER** generators meet the requirements of the main standards and regulations used in the marine industry and are employed on many ships such as those for goods transportation, cruising ships and chemical tankers.
