

Pump motors for swimming pools, spas, jacuzzis...

For many years, **LEROY-SOMER** has been the world specialist in production and design of electromechanical drive systems.

Through the experience and presence in the swimming pool market, **LEROY-SOMER** develops products adapted for integration, productivity, reliability and safety.

LEROY-SOMER designs **single or multi-speed motors** able to run with various worldwide electrical supplies, either single or three-phase supply and with the following characteristics:

- mechanical interfaces adapted to numerous pump configurations,
- simple and rapid connection to network supply,
- stainless steel shaft,

- reinforced sealing,
- increased winding insulation,
- winding with thermal reserve
- guarantee of compliance to the standards in force.

In addition the **LEROY-SOMER** international network offers competent commercial and technical assistance to customers worldwide.
